

## Spectres of Hegel

By Louis Althusser (Manuscript to be edited into formalization) – 1978, 1961, 1958

### I. Spirit – a Spiritual Category

A man is walking, he then passes by, and days and nights pass by. I call this temporality, even the future, l'avenir which lasts a long time. L'avenir dure long tempes.

### II. Political Formalization in Marx

The attachment is a automobile strike going on – and the popular front tactic.

### III. Delirium

In fact Hegel is a lecture by a man in a class room – the standard image of a man who is phenomenology of Spirit – in a conflict with the Slave protesting students – fuck May 68.

### IV. 1989

I am in a process of elaborating this method to Spirit – it is just this philosophy of Spirit, I mean we are just the process of Absolute and creative artistic life.
